

## THE PATH TO VALUE CREATION

Since its founding, OKI has been delivering a succession of advanced products and services underpinned by the Company's "enterprising spirit" to meet the needs of society. We will continue our efforts to realize a comfortable and affluent tomorrow for everyone by creating values that contribute to the development of information society.

# Open up your dreams

1881  
(14th year, Meiji Era)  
Kibataro Oki established  
Meikosha, Ltd.

Japan's postal, telegraph, and telephone services all started in the early Meiji era, and one by one evolved to become our present information communication system. In the early days of telecommunications, Kibataro recognized the future of telegraph and telephone and worked hard to develop them. Five years after the phone was brought in from the United States, he succeeded in developing Japan's first domestic telephone. The "enterprising spirit" of Kibataro who paved the way with his own technology and creativity has been passed inside the company and makes what OKI is today.
