

Environmental Protection Activity Program (Oki Eco Plan 21)

3. "Oki Eco Plan 21" and the results of activities in FY2000

Oki Electric established the "Oki Eco Plan 21" as its environmental protection activity program in 1999. This has been the foundation of all current and relevant activities.

Category		Target (Oki Eco Plan 21)	FY2000 activity results
Global warming countermeasures	Electrical power usage reduction	Electrical power consumption (energy consumption) is to be reduced by 10% of the total for FY1995, by the end of FY2000.	22.3% reduction (target achieved)
	CO ₂ emission reduction	The CO ₂ emission (by energy consumption rate) of all energy consumed is to be reduced by 10% of the total for FY1995, by the end of FY2000.	21.8% reduction (target achieved)
Countermeasures for the overloading of final waste processing plant	Reduction of industrial waste	The quantity of waste sent to the final waste processing plants is to be reduced by 70% of the total for FY1997 by the end of FY2000.	70.8% reduction (target achieved)
		Resource recycling rate is to be increased to 90%, by the end of FY2000.	Resources recycling rate: 94% (target achieved)
	Used products recycle rate improvement	Used product recycle rate is to be increased to 92%, by the end of FY2002.	Recycle rate: 96.7% (target achieved)
Eco-friendly product developments	Possible recycling rate (design stage) improvement	Possible recycling rate is to be increased by 30% of the total for FY1995, by the end of FY2000.	Possible recyclable rate: 33.1% improvement (target achieved)
	Markings for rating environmentally consciousness classified products	All major products to be marked by the end of FY2000.	"Oki Eco Product Registration Standard" established.
	Implementation of life cycle assessment (LCA)	Implementation of LCA to all major products by the end of FY2001.	LCA trial implementation conducted.
	Expansion of green procurement activities	Start green procurement by the end of FY2001.	"Harmful substances information management system" built.
Environmental management system	Increase of ISO-14001 certified sites.	All uncertified production sites are to obtain ISO-14001 certification by the end of FY2001.	Activities carried out for the certification.
Information disclosure	Environmental report disclosure	Environmental report disclosed from 1999.	Disclosures made since September, 1999.
	Environmental accounting disclosure	Environmental accounting disclosed from 2000.	Disclosure made in the Environmental Report 2000.
