

Product-related Environmental Response

Printers

Our printer products include digital photography page printers that use LED heads (color, monochrome), dot matrix printers, and others.

C8600dn

The C8600dn is a high-speed A3 printer that can be used even on desktops.

Product Features

- (1) A compact footprint allows users to set up the printer on their desktop with ease.
- (2) Four tandem digital LED heads used.
- (3) Support for paper sizes from postcards up to A3.
- (4) Support for Ethernet (100Base-TX / 10Base-T) is a standard feature.
- (5) Single-pass color technology realizes continuous printing at high speed (26 A4 color pages / minute).
- (6) A simple structure makes it easy to resolve paper jams.
- (7) Equipped with multilevel heads for high image quality.
- (8) Low running costs.

Main Efforts to Reduce Environmental Impacts

- (1) The use of LED heads instead of a laser unit made the printer lighter and smaller.

[Comparison with Laser Printers]

- No need for a polygon mirror motor and F- θ lenses to reflect the laser beam, reducing the number of mechanical parts
 - Structure of the printer was solidified (changed to electronic parts) for simplification, realizing high reliability and longevity.
- (2) The printer complies with the Green Purchasing Law.
 - (3) Compared to its predecessor C9150dn, the printer's product volume was cut by as much as 56%, making it the smallest and lightest model in its class.
