

Financial Results for Q3 FY2023

February 7, 2024

Oki Electric Industry Co., Ltd.

Summary of Financial Results

- Net sales and operating income were up significantly from the previous year.
- Net sales and operating income increased as a result of the recovery from production impacts due to the supply chain and the full-scale shipment of large-scale projects in Enterprise Solutions.
- Net income increased due to lower foreign exchange losses and improvements in taxes, etc.

Reasons for Changes in Operating Income/Loss

- The increase was due to a recovery from the impact of a production decline last year and an increase in the volume of large-scale projects.
- Investment in human resources and growth was steadily implemented.

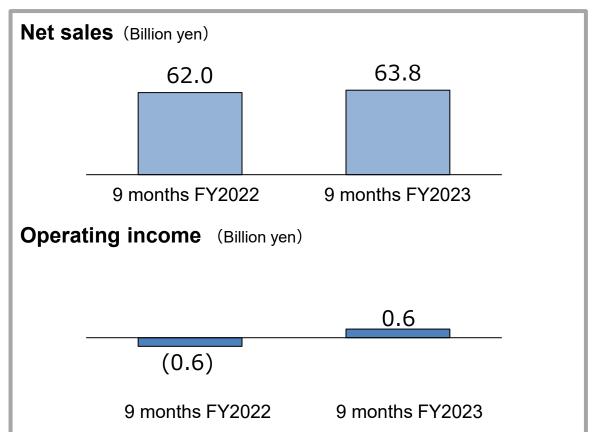

Overview by Segment (Public Solutions / Enterprise Solutions)

Public Solutions

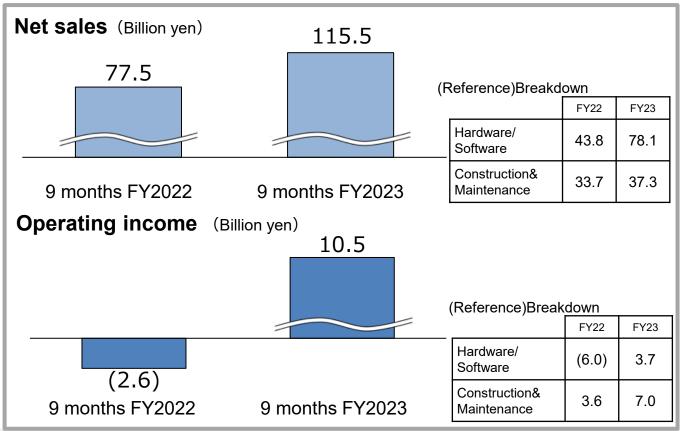

The business fields of roads, firefighting, disaster prevention, and TOKKI steadily increased. Although there was a decrease in the number of projects for communication carriers, net sales and operating income increased in the entire segment.

Enterprise Solutions

Net sales increased significantly due to improvement of the supply chain impact and large-scale projects.

Operating income increased due to higher hardware and software sales, as well as improved earnings from construction and maintenance.

Overview by Segment (Component Products / EMS)

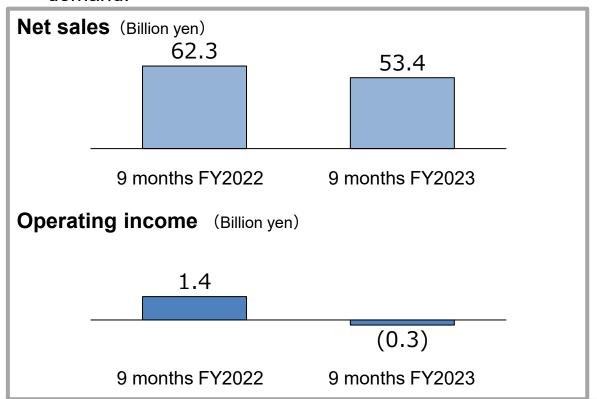

Component Products

Business conditions have not significantly changed from the first half.

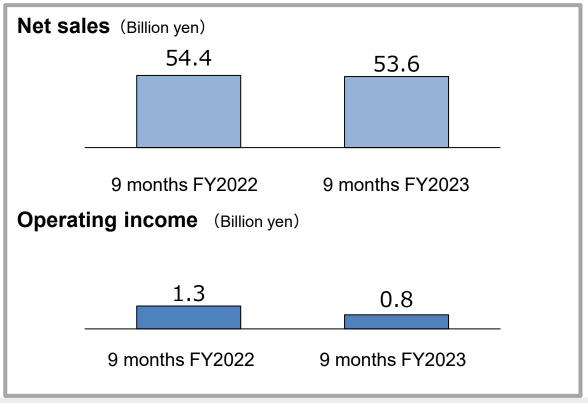

IoT is positive due to improvement from procurement difficulties due to supply chain impact.

Printer operating income declined due to the impact of a significant decrease in net sales on stagnant overseas demand.

EMS

■ The impact of the decline in demand in the FA and robot markets due to the slowdown in the semiconductor market and the Chinese economy expanded in Q3, resulting in lower net sales and profits.

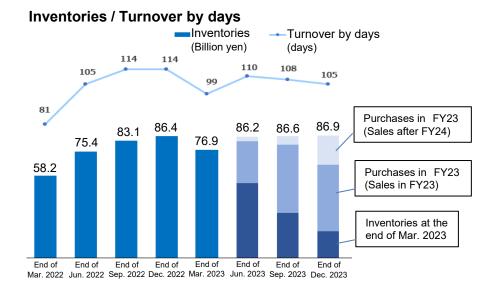

Balance Sheets

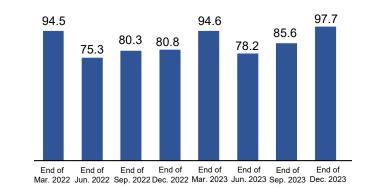

- Trade receivables increased compared to the end of September due to higher sales.
- Inventories have remained at the same level since the end of June in response to the increase in Q4 sales, but progress is being made toward normalization.
- Fixed assets increased due to higher valuation of investment securities due to stock appreciation.

- Public Solutions
- Enterprise Solutions

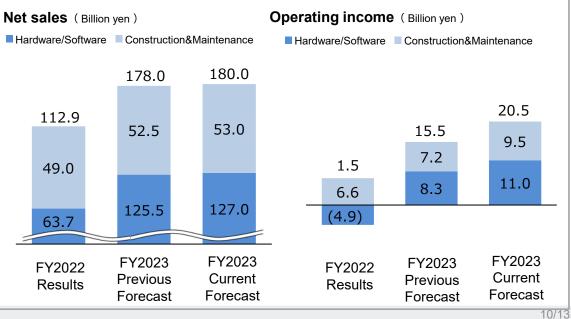

Public Solutions

- ✓ Although there are strong and weak results in each area, the business environment has not changed significantly from the initial forecast.
- ✓ Both sales and profit were revised down based on the progress of bidding projects such as firefighting and disaster prevention and projects in the aviation field.
 - •The business fields of roads, firefighting and disaster prevention increased from the previous year, partly due to the market recovery from the impact of COVID-19, etc.
 - •The TOKKI business and network business are in line with the plan.
 - •The backlog of orders for roads, firefighting, disaster prevention, and TOKKI also increased steadily for the next fiscal year's sales.

Enterprise Solutions

- ✓ Both net sales and operating income were revised upward.
- Operating income increased due to product mix, etc., in addition to an increase in volume.
