Hazard pictograms			
Signal word:	Danger		
Hazard statements	H312 Harmful in contact with skin.		
	H360D May damage the unborn child.		
Precautionary statements			
Prevention:	P201 Obtain special instructions before use.		
	P202 Do not handle until all safety precautions have been read and understood.		
	P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.		
Response:	P302 + P352 + P312 IF ON SKIN: Wash with plenty of wa-ter. Call a POISON CENTER or doctor/ physician if you feel unwell.		
	P308 + P313 IF exposed or concerned: Get medical ad-vice/ attention.		
Hazardous components w	hich must be listed on the label:		

Hazardous components which must be listed on the label:

#### 2-Butoxyethyl acetate N-Methyl-2-pyrrolidone

#### 2.3 Other hazards

Vapours may form explosive mixture with air.

#### 3. COMPOSITION / INFORMATION ON INGREDIENTS

Other components (listed on EINECS, NLP or ELINCS) are not hazardous according to the directives mentioned above.

#### 4. FIRST-AID MEASURES

4.1 Description of first aid measures

General advice:	In the case of accident or if you feel unwell, seek medical advice immediately.
	When symptoms persist or in all cases of doubt seek medical advice.
Protection of first-aiders:	First Aid responders should pay attention to self-protection, and use the recommended personal protective equipment when the potential for exposure exists.
If inhaled:	If inhaled, remove to fresh air. Get medical attention if symptoms occur.
In case of skin contact:	In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Thoroughly clean shoes before reuse.
In case of eye contact:	Flush eyes with water as a precaution. Get medical attention if irritation develops and persists.
If swallowed:	If swallowed, DO NOT induce vomiting. Get medical attention. Rinse mouth thoroughly with water
4.2 Most important symptoms and effects, both acute and delayed	
Risks:	Harmful in contact with skin. May damage the unborn child.
4.3 Indication of any immediate me	dical attention and special treatment needed
Treatment:	Treat symptomatically and supportively

# 5. FIRE-FIGHTING MEASURES

5.1 Extinguishing media	
Suitable extinguishing media:	Water spray Alcohol-resistant foam Dry chemical Carbon dioxide (CO2)

Unsuitable Extinguishing Media		
	High volume water jet	
5.2 Special hazards arising from the	ne substance or mixture	
Specific hazards during fire-fighting:	Do not use a solid water stream as it may scatter and spread fire. Flash back possible over considerable distance. Vapours may form explosive mixtures with air. Exposure to combustion products may be a hazard to health.	
Hazardous combustion products:	Carbon oxides Nitrogen oxides (NOx)	
5.3 Advice for firefighters		
Special protective equipment for firefighters:	t In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment.	
Specific extinguishing methods:	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Cool containers/tanks with water spray. Remove undamaged containers from fire area if it is safe to do so. Evacuate area.	
6. ACCIDENTAL RELEASE ME	ASURES	
6.1 Personal precautions, protective	ve equipment and emergency procedures	
Personal precautions:	Remove all sources of ignition. Use personal protective equipment. Follow safe handling advice and personal protective equipment recommendations.	
6.2 Environmental precautions		
Environmental precautions:	Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.	
6.3 Methods and material for containment and cleaning up		
Methods for cleaning up:	Non-sparking tools should be used. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Suppress (knock down) gases/vapours/mists with a water spray jet. For large spills, provide dyking or other appropriate containment to keep material from spreading. If dyked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.	

#### 6.4 Reference to other sections

See sections: 7, 8, 11, 12 and 13.

#### 7. HANDLING AND STORAGE

7.1 Precautions for safe handling	
Technical measures:	See Engineering measures under EXPOSURE CONTROLS/PERSONAL PROTECTION section.
Local/Total ventilation:	Use with local exhaust ventilation. Use only in an area equipped with explosion proof exhaust ventilation.
Advice on safe handling:	Do not get on skin or clothing. Avoid inhalation of vapour or mist. Do not swallow. Do not get in eyes. Handle in accordance with good industrial hygiene and safety practice. Keep container tightly closed. Keep away from heat and sources of ignition. Take precautionary measures against static discharges. Take care to prevent spills, waste and minimize release to the environment.
Hygiene measures:	Ensure that eye flushing systems and safety showers are located close to the working place. When using do not eat, drink or smoke. Wash contaminated clothing before reuse.
7.2 Conditions for safe storage, in	cluding any incompatibilities
Requirements for storage areas and containers:	Keep in properly labelled containers. Keep tightly closed. Keep in a cool, well-ventilated place. Store in accordance with the particular national regulations. Keep away from heat and sources of ignition.
Advice on common storage:	Do not store with the following product types: Strong oxidizing agents Explosives Gases
7.3 Specific end use(s)	
Specific use(s):	No data available

8.2 Exposure controls	Minimize workplace exposure concentrations.
Engineering measures:	Use only in an area equipped with explosion proof exhaust ventilation. Use with local exhaust ventilation.
Personal protective equipmen	t
Eye protection:	Wear the following personal protective equipment: Safety goggles
Hand protection	
Material:	Impervious gloves Flame retardant gloves
Remarks:	Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous substance and specific to place of work. Breakthrough time is not determined for the product. Change gloves often! For special applications, we recommend clarifying the resistance to chemicals of the aforementioned protective gloves with the glove manufacturer. Wash hands before breaks and at the end of workday.
Skin and body protection:	Select appropriate protective clothing based on chemical resistance data and an assessment of the local exposure potential. Wear the following personal protective equipment: Flame retardant antistatic protective clothing. Skin contact must be avoided by using impervious protective clothing (gloves, aprons, boots, etc).
Respiratory protection	Use respiratory protection unless adequate local exhaust ventilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines.
Filter type:	Organic vapour type (A)

13. DISPOSAL CONSIDERATIO	ONS
13.1 Waste treatment methods	
Product:	Dispose of in accordance with local regulations.
	According to the European Waste Catalogue, Waste Codes are not product specific, but application specific.
	Waste codes should be assigned by the user, preferably in
	discussion with the waste disposal authorities.
Contaminated packaging:	Dispose of as unused product. Empty containers should be taken to an approved waste
	handling site for recycling or disposal.
	Do not burn, or use a cutting torch on, the empty drum.
