

# OKI's MC883 A3 colour multifunction printer

**P**owered by OKI's pioneering digital LED technology, the easy-to-use MC883 produces super sharp, text and exceptional High-Definition Colour images in ultra-high quality 1200 x 1200 dpi resolution on a range of media sizes, from A6 to 1.3m banners and weights of up to 256gsm.

With an ergonomic design, the MC883 includes built-in stapling for up to 20 sheets, two output trays, a maximum paper capacity of over 2,000 sheets and print speeds of 35ppm. The new smart MFP also features comprehensive scan and document management functionality and a fully customisable 7" colour touchscreen.

To help streamline document-intensive business processes and improve productivity, OKI's flexible smart Extendable Platform (sXP) enables seamless integration between the MC883 and third-party solutions, including PaperCut MF and Drive Image, as well as OKI exclusive software SENDYS Explorer.

## Construction

The MC883 is fully equipped to support construction businesses where the ability to print and scan documents and plans to a professional quality at any time is key to keeping projects on track and customers satisfied.

Easy user maintenance eliminates the need for engineer callouts, ensuring documents can be scanned, stored, copied or printed at all times, including site badges, contractor information, delivery orders, and health and safety certificates.

The MC883 also can fit into busy environments including construction sites where office space can be limited and can print the fine details of drawings, plans, blueprints, and instructions, as well as signage on-site, without the need for outsourcing, saving time, money and space.

## Healthcare

Helping healthcare organisations run smoothly while protecting patient confidentiality, the MC883, ensures the availability and confidentiality of information at all times. The robust security of the MC883 safeguards patient data throughout the document workflow and the high colour print resolution ensures clarity for patients, admin staff and healthcare professionals. The smart MFP's 7" colour touchscreen creates and records custom Job Macros for frequent tasks and help to save time, while advanced security features safeguard confidential records with access secured through PIN or ID authentication.

Advanced security features guarantee patient safety and security, while smart document digitising and filing, speeds up the reporting process and increases the accuracy of patient records. Hospitals and clinics can quickly scan, file and share documents in real-time, making them accessible anywhere, at any time for those with the right authorisation.

## Professional Services Businesses

Bringing flexibility and traceability to document workflows, with advanced authentication for the professional services sector, users can rely on fast, accurate and secure document management in order to meet client needs.

As well as handling sensitive documents such as legal files, contracts, financial records and invoices and ensuring they are kept secure at all times with full traceability, to improve productivity, efficiency and security, the MC883 features SENDYS Explorer.

*Built for the most demanding business environments, OKI's smart A3 colour MFP, the MC883 delivers on print colour and copy performance, as well as flexible, efficient and secure document capture, collaboration and management*
