

Mobile Printing

Conducting business as usual while on the move

With an ever increasing mobile workforce, and the growing popularity of tablets, smartphones and laptops, printing documents where and when you need them adds a whole new meaning to print on demand providing you have access to a compatible device. Thanks to the many mobile applications available, you no longer have to wait to be 'back in the office' to print and share documents essential to your business, customers or partners.

Cloud or mobile printing works by connecting to a network, wireless or web-enabled printer through a smartphone or tablet, allowing you to print remotely from anywhere in the world, without having to connect directly to a printing device. You can keep your business going whilst you are on the go.

Key Features

- Print any document, photograph or web page from a mobile device
- Improve workflow efficiencies
- Print from any mobile device to any printer
- Secure and hassle-free
- Convenient for mobile workers
- Flexibility to choose where and when to print

Mobile Printing

OKI Products and Mobile Printing

OKI printers are compatible with a number of device agnostic applications available, so you can download an application of your choice that enables you to print to almost any device simply through a single mobile printing application.

AirPrint by Apple Inc, Google Cloud Print by Google Inc, Cortado Workplace and ePrint by Microtech Corp, are compatible with OKI's portfolio of mono and colour LED printers and MFPs.

AirPrint (Apple Inc.) – **Compatible with iPhone, iPad, iPod Touch**

Apple Inc has developed a mobile printing solution called AirPrint that makes printing from Apple devices such as an iPhone, iPad or iPod Touch easy. All you need is a compatible Apple iOS device and an OKI printer that supports AirPrint. There is no need to download software or printer drivers or to configure or set-up your iOS or printer device. You simply need to ensure that the printer is connected to the same Wi-Fi network as your iOS device.

OKI product compatibility: Visit www.okieurope.com/mobileprinting

Google Cloud Print (Google Inc.) – **Compatible with iPhone, iPad and Android devices**

Google Inc has developed a cloud printing service called Google Cloud Print™ enabling users to print on the go from a smartphone or computer using Google Cloud Print enabled apps. All you need is a compatible device and an OKI printer that is Google Cloud Print Ready™.

Cortado Workplace – **Compatible with iPhone, iPad, iPod Touch, BlackBerry, Android and Symbian**

Cortado is an OKI partner, well-established in the business sector as a cloud and mobile printing solution. Cortado Workplace is a mobile printing app that enables you to print with a tablet, smartphone, PC or Mac. You can access your files from everywhere at any time, copy them to other devices and work and print on-the-go.

OKI product compatibility: All networked OKI PCL or PS products

ePrint app (Microtech Corp) – **Compatible with iOS and Android devices**

ePrint from Microtech is an mobile printing app for your iOS and Android devices. It enables you to print cards and calendar pages using photos stored in your device library, print notes you take within the app, and print a list of selected contacts.

OKI product compatibility: All networked OKI PCL or PS products
