

The professional A4 neon printer for garment decoration, design, POS and education

Pro6410 NeonColor - Adding a new dimension to colour printing

Imagine having the ability to print images in-house free of limitations of the standard CMY colour spectrum. With OKI's ground-breaking Pro6410 NeonColor printer you can print super-bright fluorescent colours on almost anything, helping to grow your business and access new, lucrative revenue streams by offering customers

- Garment and product decoration
- Personalisation
- Packaging and proofing
- POS and Signage
- Education

Neon Colour - A technology first

Incorporating a unique black or white quick swap print cartridge feature, the Pro6410 NeonColor makes it easy to produce dazzling fluorescent effects on either dark or light backgrounds.

This unique approach offers the additional flexibility to use OKI's neon white toner as a security mark only revealed when checked under UV black light or to provide a white background for transfer to dark substrates.

For the retail sector this is the perfect printer to help drive customers through your door. Create stunning effects with neon colour to spark interest in the special offers of the day. Seductive signage, POS displays and window graphics using neon colour will all command the customer's attention and increase sales.

Combining High Definition digital LED colour printing with neon toner technology, the Pro6410 NeonColor offers media versatility up to A4, paper weights up to 250gsm and cost-effective printing for a wide range of applications that previously required expensive proofing or manual printing techniques.

In-house printing just got smarter – in daringly bright fluorescent colours

Unsurpassed by rival technology, the Pro6410 NeonColor is taking speciality printing to a new level, with a simplicity and ease-of-use that guarantees super-fast ROI.

The printer's unique features add eye-catching dimensions to conventional graphics, making it possible to create impactful personalised designs for every kind of product.

Innovative neon colours generate the wow factor when brought to life under UV black light, while 3D glasses bring a funky new dimension to neon colour images. Banners, tickets and point-of-sale barkers all resonate with colour, while the vibrant tones electrify T-shirt and garment decoration.

Combine all of these superior features with outstanding graphics quality provided by OKI's pioneering digital LED technology and the use of all-in-one consumables, and it's clear we have a revolution on our hands in printing for the graphics, design and merchandising sectors.

Print Smart, Print OKI!
