

Smart Managed Document Solutions from OKI

Smart Managed Document Solutions can reduce your overall costs while improving efficiencies and employee productivity. This offering from OKI can transform your business processes and remove the burden of printer ownership by managing your fleet so that your IT resources can focus on critical business needs.

Ongoing Fleet Optimization

Continuous fleet monitoring will uncover additional cost-savings opportunities. Optimized services include device and usage tracking and strategic recommendations to ensure ongoing improvements to your print fleet as your business changes over time.

Print Assessment & Recommendation

Your entire print fleet operation will be analyzed using industry best practices, and a brand agnostic recommendation will be provided to maximize productivity and decrease costs.

Initial Fleet Optimization

Hardware, services and supplies will be installed or redeployed to consolidate devices, maximize productivity and lower operating costs.

Consolidated Invoice

Manage your print budget with one consolidated invoice based on per-page costs to remove unexpected expenses.

Remote Monitoring and Management

Devices will be automatically monitored for consumable usage, service issues and life-cycle asset management—freeing up internal IT resources to focus on more critical business needs.

Automatic Supplies and Service

Based on remote monitoring, supplies and services are automatically dispatched to your location as needed. As a result, productivity and employee satisfaction increases while downtime decreases.

OKI[®]

Smart Managed Document Solutions provides:

- Immediate and long-term print cost reduction
- Streamlined print operations for improved productivity
- Ability to upgrade aging fleets without the capital expenditures associated with equipment purchases
- Predictable expense reporting for improved budget management
- Ability to free up internal IT resources to focus on critical business needs
- Improved printer service levels to minimize printer downtime and user interventions

WHY SMART MANAGED DOCUMENT SOLUTIONS?

Choosing OKI as your partner is critical to the successful outsourcing and management of your print fleet.

Our Smart Managed Document Solutions offering provides organizations the following benefits:

- Brand- and device-agnostic recommendations for products, systems, tools, processes, methodologies and services
- Proven track record of measured savings and optimization with businesses of all sizes and industries
- Scalable print management solutions designed using OKI's fully developed infrastructure, methodology and expertise to deliver exactly what your organization needs

Establishing a Smart Managed Document Solutions business model is an astute print strategy for your company. It's more than outsourcing the management of your print fleet or the hardware you choose—it's a long-term business strategy that drives continuous improvement of an organization's fleet, process, workflow and business operations.

Start today with a no-obligation, in-depth and secure print assessment.

“OKI stepped up to the plate as the only printer manufacturer to examine our printing infrastructure closely enough to develop a series of printing solutions that specifically addresses our needs and saves us money. They are more than a vendor. They are a partner.”

Jim Ingalzo, Technology Manager,
Pennsylvania Office of Attorney General

Proven Savings

According to Gartner, a leading industry analyst, the average company is spending up to 3% of its total revenue per year on document output. Meanwhile, International Data Corporation (IDC), a leading market intelligence firm, found in a recent study that a well-executed MPS program can reduce costs up to 28%. OKI's experience has been no less dramatic. A recent engagement with a school district in New York, whose optimization plan identified a potential cost savings of 30%, actually realized a 60% decrease in document output costs after one year.
