

Toner Powder (Cartridge) for

Pro6410 Neon Colour series

OKI DATA CORPORATION

NOTE:-A safety data sheet is not required for this product under Article 31 of REACH. This safety data sheet is provided on a voluntary basis

Date of Issue: 7th June 2018 Page **1** of **64** 

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

**Product name:** Black toner powder (cartridge) for

Pro6410 Neon Colour Series (Toner powder name: ODK-9)

Product description: Black Toner

1.2 Relevant identified uses of the substance or mixture and uses advised against

Material uses: For electrophotographic printing systems

1.3 Details of the supplier of the safety data sheet

Manufacturer: OKI Data Corporation

3-1 Futaba-cho, Takasaki-shi, Gunma. 370-8585 Japan

Tel: +81 27-328-6366 Fax: +81-27-328-6398

**Supplier:** OKI Europe Limited

Blays House, Wick Road, Egham, Surrey, TW20 0HJ, UK Tel: +44 (0) 208 219 2190 Fax: +44 (0) 208 219 2199

e-mail: SDSQuestions@okieurope.com

1.4 Emergency telephone number

**OKI Europe Limited:** +44 (0) 208 219 2190

(Supported 09:00 to 17:00 UK Time, Monday to Friday

except Bank Holidays)

#### SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

Ingredients of unknown toxicity: Percentage of the mixture consisting of ingredient(s) of

unknown toxicity: 1,9%

Ingredients of unknown ecotoxicity: Percentage of the mixture consisting of ingredient(s) of

unknown hazards to the aquatic environment: 90,7%

See Section 11 for more detailed information on health effects and symptoms.

See Section 16 for the full text of the H statements declared above.

Date of Issue: 7th June 2018 Page 2 of 64

2.2 Label elements

**Hazard pictograms:** No pictogram. **Signal word:** No signal word.

**Hazard statements:** No known significant effects or critical hazards.

**Precautionary statements** 

Prevention:Not applicable.Response:Not applicable.Storage:Not applicable.Disposal:Not applicable.

Hazardous ingredients:

Supplemental label elements: Safety Data Sheet available for professional user on request.

#### 2.3 Other hazards

#### Other hazards which do not result in classification:

Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## **SECTION 3: Composition/information on ingredients**

Substance/mixture: Mixture

Product/ingredient name	REACH Registration number	EC number	%	Classification Regulation (EC) No. 1272/2008 [CLP]	Туре
Carbon black	01-2119384822-32	215-609-9	2.5 - 5	Not classified.	[2]
Paraffin		232-315-6	1 - 2.5	Not classified.	[2]

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

#### Type

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

Occupational exposure limits, if available, are listed in Section 8.

Date of Issue: 7th June 2018 Page 3 of 64

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

training.

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the

upper and lower eyelids. Check for and remove any contact lenses.

Get medical attention if irritation occurs.

**Inhalation:** Remove victim to fresh air and keep at rest in a position comfortable

for breathing. Get medical attention if symptoms occur.

Skin contact: Flush contaminated skin with plenty of water. Remove contaminated

clothing and shoes. Get medical attention if symptoms occur.

Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at

rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by

medical personnel. Get medical attention if symptoms occur.

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Potential acute health effects

Eye contact: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the nose, throat and lungs.

**Skin contact:** No known significant effects or critical hazards. **Ingestion:** No known significant effects or critical hazards.

#### Over-exposure signs/symptoms

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

**Skin contact:** No specific data. **Ingestion:** No specific data.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

**Specific treatments:** No specific treatment.

Date of Issue: 7th June 2018 Page 4 of 64

## **SECTION 5: Firefighting measures**

5.1 Extinguishing media

Suitable extinguishing media: Use dry chemical powder.

**Unsuitable extinguishing media:** Do not use water jet.

5.2 Special hazards arising from the substance or mixture

**Hazards from the substance or mixture:** Fine dust clouds may form explosive mixtures

with air.

Hazardous combustion products: Decomposition products may include the

following materials: Carbon dioxide

Carbon monoxide Halogenated compounds

Metal oxide/oxides

5.3 Advice for firefighters

**Special precautions for firefighters:** Promptly isolate the scene by removing all

persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-

exposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective

equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection

for chemical incidents.

#### **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without

suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on

appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take

note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency

personnel".

6.2 Environmental precautions: Avoid dispersal of spilled material and runoff and contact with

soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution

(sewers, waterways, soil or air).

Date of Issue: 7th June 2018 Page 5 of 64

#### 6.3 Methods and materials for containment and cleaning up

Small spill: Move containers from spill area. Vacuum or sweep up material

> and place in a designated, labelled waste container. Use sparkproof tools and explosion-proof equipment. Dispose of via a

licensed waste disposal contractor.

Move containers from spill area. Approach release from upwind. Large spill:

Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosionproof equipment. Dispose of via a licensed waste disposal

contractor.

Note:-See Section 1 for emergency contact information and

Section 13 for waste disposal.

6.4 Reference to other sections: emergency contact information. Section 1 for

See Section 8 for information on appropriate personal protective

equipment.

See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling Protective measures:

Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Date of Issue: 7th June 2018 Page 6 of 64

7.3 Specific end use(s)

**Recommendations:** Not available. **Industrial sector specific solutions:** Not available.

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
Europe	
Carbon black	ACGIH TLV (United States, 1/2011).
	TWA: 3mg/m³, 8 hour(s).
	Form: -Inhalable fraction
Paraffin	ACGIH TLV (United States, 1/2011).
	TWA: 2mg/m³, 8 hour(s). Form:-Fume
Germany	
No exposure limit value known.	
Spain	
Carbon black	INSHT (Spain, 2/2011).
	TWA: 3.5mg/m³, 8 hour(s).
Paraffin	INSHT (Spain, 2/2011).
	TWA: 2mg/m³, 8 hour(s). Form:-Fume

#### Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to European Standard EN 689 for methods for the assessment of exposure by inhalation to chemical agents and national guidance documents for methods for the determination of hazardous substances.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available.

#### 8.2 Exposure controls

#### Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Date of Issue: 7th June 2018 Page **7** of **64** 

#### **Individual protection measures**

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Recommended: Splash goggles

Safety glasses with side-shields

Skin protection
Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. >8 hours (breakthrough time):

**Body protection:** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Recommended: Lab coat Overall

Other skin protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection:

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Environmental exposure controls:** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Remark:

The penetration-time of the recommended gloves depends not only on the material. Also other factors may have influence on the penetration-time, as the thickness of them or the specific use or conditions (temperature). In any case, certificate materials (for example following EN 374) should be selected. Please ask your supplier, if the gloves are suitable for the intended use

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and chemical properties

<u>Appearance</u>

Physical state: Solid. [Powder.]

Colour: Black.

Odour:

Odour threshold:

PH:

Not available.

Not applicable.

Not applicable.

Not applicable.

Not applicable.

Not available.

Evaporation rate (butyl acetate= 1):

Flammability (solid, gas):

Upper/lower flammability or explosive limits:

Not available.

Not available.

Vapour density:

**Density:** 1.2 g/cm3 (20°c)

Solubility(ies): Insoluble in the following materials:

Cold and hot water.

Partition coefficient n-octanol/water: Not available.

Decomposition temperature: Not available.

Viscosity ( Dynamic ):

**Explosive properties:** Explosive in the presence of the following

materials or conditions: open flames,

sparks and static discharge.

Oxidizing properties: Not available.

9.2 Other information

No additional information.

## SECTION 10: Stability and reactivity

10.1 Reactivity: No specific test data related to reactivity available for

this product or its ingredients.

**10.2 Chemical stability:** The product is stable.

**10.3 Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous

reactions will not occur.

**10.4 Conditions to avoid:** Avoid the creation of dust when handling and avoid all

possible sources of ignition (spark or flame). Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Prevent dust accumulation.

**10.5 Incompatible materials:** Reactive or incompatible with the following materials:

Oxidizing materials

**10.6 Hazardous decomposition products:** Under normal conditions of storage and use, hazardous

decomposition products should not be produced.

Date of Issue: 7th June 2018 Page **9** of **64** 

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

**Acute toxicity** 

Product/ingredient name	Result	Species	Dose	Exposure
ODK-9 20kg BX	LD50 Oral	Rat	>2000 mg/kg	-
Carbon black	LD50 Oral	Rat	>15400 mg/kg	-

**Conclusion/Summary:** Not available.

**Acute toxicity estimates**

Not available.			

Aspiration hazard

Product/ingredient name	Result
Not available.	

Information on the likely routes of exposure: Not available.

Potential acute health effects

Inhalation: Exposure to airborne concentrations above statutory or

recommended exposure limits may cause irritation of the

nose, throat and lungs.

Ingestion: No known significant effects or critical hazards. Skin contact: No known significant effects or critical hazards.

Eye contact: Exposure to airborne concentrations above statutory or

recommended exposure limits may cause irritation of the

eyes.

Date of Issue: 7th June 2018 Page **10** of **64** 

Symptoms related to the physical, chemical and toxicological characteristics

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing
o specific dat

Ingestion:No specific data.Skin contact:No specific data.

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

Delayed and immediate effects and also chronic effects from short and long term

exposure

Short term exposure

Potential delayed effects: Not available. Potential immediate effects: Not available.

Long term exposure

Potential immediate effects: Not available. Potential delayed effects: Not available.

Potential chronic health effects

Not available.

Conclusion/Summary: Not available.

**General:** Repeated or prolonged inhalation of dust may lead to chronic

respiratory irritation.

Carcinogenicity:

No known significant effects or critical hazards.

Interactive effects: Not available.
Absorption: Not available.
Distribution: Not available.
Metabolism: Not available.
Elimination: Not available.
Other information: Not available.

## **SECTION 12: Ecological information**

12.1 Toxicity

Product/ingredient name	Result	Species	Exposure	
Carbon black	Acute EC50 > 1000 mg/l	Fish	96 hours	203 Fish, Acute
				Toxicity Test

Conclusion/Summary: Not available.

12.2 Persistence and degradability

Conclusion/Summary: Not available.

**12.3 Bioaccumulative potential:** Not available.

12.4 Mobility in soil

**Soil/water partition coefficient (Koc):** Not available. **Mobility:** Not available.

12.5 Results of PBT and vPvB assessment

PBT: Not applicable. vPvB: Not applicable.

**12.6 Other adverse effects:** No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

#### **Product**

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Significant quantities of waste product residues should not be disposed of via the foul sewer. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal

legislation and any regional local authority requirements.

Hazardous waste: Within the present knowledge of the supplier, this product is not

regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

**Packaging** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Waste packaging should be recycled. Incineration or landfill

should only be considered when recycling is not feasible.

**Special precautions:** This material and its container must be disposed of in a safe way. Care

should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and

contact with soil, waterways, drains and sewers.

Date of Issue: 7th June 2018 Page **12** of **64**

### SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Ingredients of unknown toxicity: Percentage of the mixture consisting of ingredient(s) of

unknown toxicity: 34,3%

Ingredients of unknown ecotoxicity: Percentage of the mixture consisting of ingredient(s) of

unknown hazards to the aquatic environment: 90,5%

See Section 11 for more detailed information on health effects and symptoms.

See Section 16 for the full text of the H statements declared above.

Date of Issue: 7th June 2018 Page **15** of **64** 

2.2 Label elements

Hazard pictograms: No pictogram. Signal word: No signal word.

**Hazard statements:** No known significant effects or critical hazards.

**Precautionary statements** 

Prevention:Not applicable.Response:Not applicable.Storage:Not applicable.Disposal:Not applicable.

Hazardous ingredients:

Supplemental label elements: Not applicable.

#### 2.3 Other hazards

#### Other hazards which do not result in classification:

Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## **SECTION 3: Composition/information on ingredients**

Substance/mixture: Mixture

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

#### <u>Type</u>

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

training.

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the

upper and lower eyelids. Check for and remove any contact lenses.

Get medical attention if irritation occurs.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable

for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical

surveillance for 48 hours.

Skin contact: Flush contaminated skin with plenty of water. Remove contaminated

clothing and shoes. Get medical attention if symptoms occur.

Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at

rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by

medical personnel. Get medical attention if symptoms occur.

Date of Issue: 7th June 2018 Page **16** of **64** 

## 4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the nose, throat and lungs. Exposure to decomposition products may cause a health hazard. Serious

effects may be delayed following exposure.

**Skin contact:** No known significant effects or critical hazards. **Ingestion:** No known significant effects or critical hazards.

Over-exposure signs/symptoms

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

**Skin contact:** No specific data. **Ingestion:** No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: In case of inhalation of decomposition products in a fire, symptoms may

be delayed. The exposed person may need to be kept under medical

surveillance for 48 hours.

**Specific treatments:** No specific treatment.

## **SECTION 5: Firefighting measures**

5.1 Extinguishing media

Suitable extinguishing media: Use dry chemical powder.

**Unsuitable extinguishing media:** Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture: Fine dust clouds may form explosive mixtures

with air.

Hazardous combustion products: Decomposition products may include the

following materials: Carbon dioxide Carbon monoxide Nitrogen oxides

Sulphur oxides

Halogenated compounds Metal oxide/oxides

Date of Issue: 7th June 2018 Page **17** of **64** 

5.3 Advice for firefighters

Special precautions for firefighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective

equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection

for chemical incidents.

### **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without

suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on

appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take

note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency

personnel".

**6.2 Environmental precautions:** Avoid dispersal of spilled material and runoff and contact with

soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution

(sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill:

Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Use spark-proof tools and explosion-proof equipment. Dispose of via a

licensed waste disposal contractor.

Large spill: Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal

contractor.

**6.4 Reference to other sections:** See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective

equipment.

See Section 13 for additional waste treatment information.

Date of Issue: 7th June 2018 Page **18** of **64** 

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling Protective measures:

Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition precautionary measures sources. Take electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

#### **Seveso II Directive**

This product is not controlled under the Seveso II Directive

#### 7.3 Specific end use(s)

Recommendations: Not available. Industrial sector specific solutions: Not available.

Date of Issue: 7th June 2018 Page 19 of 64

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker or exposure or environmental releases.

#### 8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values		
Europe No exposure limit value known.			
Germany No exposure limit value known.			
Spain No exposure limit value known.			

#### Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards , such as the following:

European Standard EN 689 (Workplace atmospheres – Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy)

European Standard EN 14042 (Workplace atmospheres – Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents)

European Standard EN 482 (Workplace atmospheres – General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available.

#### 8.2 Exposure controls

Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Date of Issue: 7th June 2018 Page **20** of **64** 

#### **Individual protection measures**

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Recommended: Splash goggles

Safety glasses with side-shields

Skin protection
Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. >8 hours (breakthrough time): natural rubber (latex)

**Body protection:** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Recommended: Lab coat Overall

Other skin protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection:** 

Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Environmental exposure controls:** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Remark:

The penetration-time of the recommended gloves depends not only on the material. Also other factors may have influence on the penetration-time, as the thickness of them or the specific use or conditions (temperature). In any case, certificate materials (for example following EN 374) should be selected. Please ask your supplier, if the gloves are suitable for the intended use

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and chemical properties

<u>Appearance</u>

Physical state: Solid. [Powder.]

Colour: Blue. Odour: Odourless. Odour threshold: Not available. pH: Not applicable. Melting point: Not available. Initial boiling point and boiling range: Not available. Flash point: Not available. Evaporation rate (butyl acetate= 1): Not available. Flammability (solid, gas): Not available.

Upper/lower flammability or explosive limits:Not available.Vapour density:Not available.Density:1.2 g/cm3 (20°c)

**Solubility(ies):** Partially soluble in the following materials:

Acetone.

Insoluble in the following materials:

Cold and hot water.
Not available.

Partition coefficient n-octanol/water:Not available.Decomposition temperature:Not available.Viscosity ( Dynamic ):Not available.

**Explosive properties:** Explosive in the presence of the following

materials or conditions:

Open flames Sparks

Static discharge. Not available.

9.2 Other information

No additional information.

Oxidizing properties:

## **SECTION 10: Stability and reactivity**

**10.1 Reactivity:**No specific test data related to reactivity available for

this product or its ingredients.

**10.2 Chemical stability:** The product is stable.

**10.3 Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous

reactions will not occur.

**10.4 Conditions to avoid:** Explosive in the presence of the following materials or

conditions: Open flames Sparks

Static discharge.

**10.5 Incompatible materials:** Reactive or incompatible with the following materials:

Oxidizing materials

**10.6 Hazardous decomposition products:** Under normal conditions of storage and use, hazardous

decomposition products should not be produced.

Date of Issue: 7th June 2018 Page **22** of **64** 

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

**Acute toxicity** 

**Conclusion/Summary:** Not available.

Acute toxicity estimates

**Teratogenicity** 

**Conclusion/Summary:** Not available.

#### Specific target organ toxicity (single exposure)

#### Specific target organ toxicity (repeated exposure)

### Potential acute health effects

Inhalation: Exposure to airborne concentrations above statutory or

recommended exposure limits may cause irritation of the nose, throat and lungs. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed

following exposure.

Ingestion: No known significant effects or critical hazards. Skin contact: No known significant effects or critical hazards.

Exposure to airborne concentrations above statutory or

recommended exposure limits may cause irritation of the

eyes.

Date of Issue: 7th June 2018 Page 23 of 64

Symptoms related to the physical, chemical and toxicological characteristics

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

Ingestion:No specific data.Skin contact:No specific data.

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

Potential chronic health effects

Conclusion/Summary: Not available.

**General:** Repeated or prolonged inhalation of dust may lead to chronic

respiratory irritation.

Carcinogenicity:

No known significant effects or critical hazards.

Interactive effects:
Absorption:
Distribution:
Not available.

## **SECTION 12: Ecological information**

12.1 Toxicity

Conclusion/Summary: Not available.

12.2 Persistence and degradability

12.3 Bioaccumulative potential:

12.4 Mobility in soil

**Soil/water partition coefficient (Koc):** Not available. **Mobility:** Not available.

12.5 Results of PBT and vPvB assessment

**12.6 Other adverse effects:** No known significant effects or critical hazards.

Date of Issue: 7th June 2018 Page **24** of **64** 

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

**Product** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of

all authorities with jurisdiction.

Hazardous waste: Within the present knowledge of the supplier, this product is not

regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

**Packaging** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Waste packaging should be recycled. Incineration or landfill

should only be considered when recycling is not feasible.

**Special precautions:** This material and its container must be disposed of in a safe way.

Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways,

drains and sewers.

## **SECTION 14: Transport information**

#### Notice to reader

The information in this SDS is based on the present state of our knowledge and on current laws. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. The information in this SDS is meant to be a description of the safety requirements for our product. It is not to be considered a guarantee of the product's properties.

Date of Issue: 7th June 2018 Page **27** of **64** 

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

**Product name:** Yellow toner powder (cartridge) for

Pro6410 Neon Colour Series (Toner powder name: ONY-1)

Product description: Yellow Toner

1.2 Relevant identified uses of the substance or mixture and uses advised against

**Material uses:** For electrophotographic printing systems

1.3 Details of the supplier of the safety data sheet

Manufacturer: OKI Data Corporation

3-1 Futaba-cho, Takasaki-shi, Gunma. 370-8585 Japan

Tel: +81 27-328-6366 Fax: +81-27-328-6398

**Supplier:** OKI Europe Limited

Blays House, Wick Road, Egham, Surrey, TW20 0HJ, UK Tel: +44 (0) 208 219 2190 Fax: +44 (0) 208 219 2199

e-mail: SDSQuestions@okieurope.com

1.4 Emergency telephone number

**OKI Europe Limited:** +44 (0) 208 219 2190

(Supported 09:00 to 17:00 UK Time, Monday to Friday

except Bank Holidays)

#### SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

**Ingredients of unknown toxicity:** Percentage of the mixture consisting of ingredient(s) of

unknown toxicity: 31,8%

Ingredients of unknown ecotoxicity: Percentage of the mixture consisting of ingredient(s) of

unknown hazards to the aquatic environment: 80%

See Section 11 for more detailed information on health effects and symptoms.

See Section 16 for the full text of the H statements declared above.

Date of Issue: 7th June 2018 Page **28** of **64** 

2.2 Label elements

Hazard pictograms: No pictogram. Signal word: No signal word.

**Hazard statements:** No known significant effects or critical hazards.

**Precautionary statements** 

Prevention:Not applicable.Response:Not applicable.Storage:Not applicable.Disposal:Not applicable.

Hazardous ingredients:

Supplemental label elements: Not applicable.

#### 2.3 Other hazards

#### Other hazards which do not result in classification:

Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## **SECTION 3: Composition/information on ingredients**

Substance/mixture: Mixture

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

#### <u>Type</u>

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

training.

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the

upper and lower eyelids. Check for and remove any contact lenses.

Get medical attention if irritation occurs.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable

for breathing. Get medical attention if symptoms occur.

Skin contact: Flush contaminated skin with plenty of water. Remove contaminated

clothing and shoes. Get medical attention if symptoms occur.

Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at

rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by

medical personnel. Get medical attention if symptoms occur.

Date of Issue: 7th June 2018 Page 29 of 64

## 4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the nose, throat and lungs.

**Skin contact:** No known significant effects or critical hazards. **Ingestion:** No known significant effects or critical hazards.

Over-exposure signs/symptoms

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

**Skin contact:** No specific data. **Ingestion:** No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

**Specific treatments:** No specific treatment.

## **SECTION 5: Firefighting measures**

5.1 Extinguishing media

Suitable extinguishing media: Use dry chemical powder.

**Unsuitable extinguishing media:** Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture: Fine dust clouds may form explosive mixtures

with air.

Hazardous combustion products: Decomposition products may include the

following materials: Carbon dioxide Carbon monoxide

Halogenated compounds Metal oxide/oxides

Date of Issue: 7th June 2018 Page 30 of 64

5.3 Advice for firefighters

Special precautions for firefighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-

exposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective

equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection

for chemical incidents.

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without

suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on

appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take

note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency

personnel".

**6.2 Environmental precautions:** Avoid dispersal of spilled material and runoff and contact with

soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution

(sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill:

Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Use spark-proof tools and explosion-proof equipment. Dispose of via a

licensed waste disposal contractor.

Large spill: Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal

contractor.

**6.4 Reference to other sections:** See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective

equipment.

See Section 13 for additional waste treatment information.

Date of Issue: 7th June 2018 Page **31** of **64** 

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling Protective measures:

Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition precautionary measures sources. Take electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

#### 7.2 Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

#### **Seveso II Directive**

This product is not controlled under the Seveso II Directive

#### 7.3 Specific end use(s)

Recommendations: Not available. Industrial sector specific solutions: Not available.

Date of Issue: 7th June 2018 Page 32 of 64

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker or exposure or environmental releases.

#### 8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
Europe	
No exposure limit value known.	
C	
Germany	
No exposure limit value known.	
Spain	
No exposure limit value known.	
The expectation many value in the same	

#### Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards , such as the following:

European Standard EN 689 (Workplace atmospheres – Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy)

European Standard EN 14042 (Workplace atmospheres – Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents)

European Standard EN 482 (Workplace atmospheres – General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs/DMELs**

No DNELs/DMELs available.

#### **PNECs**

No PNECs available.

#### 8.2 Exposure controls

Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Date of Issue: 7th June 2018 Page **33** of **64** 

#### **Individual protection measures**

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Recommended: Splash goggles

Safety glasses with side-shields

Skin protection
Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. >8 hours (breakthrough time): natural rubber (latex)

**Body protection:** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Recommended: Lab coat Overall

Other skin protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

**Respiratory protection:** 

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Environmental exposure controls:** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Remark:

The penetration-time of the recommended gloves depends not only on the material. Also other factors may have influence on the penetration-time, as the thickness of them or the specific use or conditions (temperature). In any case, certificate materials (for example following EN 374) should be selected. Please ask your supplier, if the gloves are suitable for the intended use

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and chemical properties

<u>Appearance</u>

Physical state: Solid. [Powder.]

Colour: Yellow. Odour: Odourless. Odour threshold: Not available. Not applicable. pH: Melting point: Not available. Initial boiling point and boiling range: Not available. Flash point: Not available. Evaporation rate (butyl acetate= 1): Not available. Flammability (solid, gas): Not available.

Upper/lower flammability or explosive limits: Not available. Vapour density: Not available. Density: 1.2 g/cm3 (20°c)

Solubility(ies): Partially soluble in the following materials:

Acetone.

Insoluble in the following materials:

Cold and hot water. Not available.

Partition coefficient n-octanol/water:Not available.Decomposition temperature:Not available.Viscosity ( Dynamic ):Not available.

**Explosive properties:** Explosive in the presence of the following

materials or conditions:

Open flames Sparks

Static discharge. Not available.

9.2 Other information

No additional information.

Oxidizing properties:

## **SECTION 10: Stability and reactivity**

**10.1 Reactivity:**No specific test data related to reactivity available for

this product or its ingredients.

**10.2 Chemical stability:** The product is stable.

**10.3 Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous

reactions will not occur.

**10.4 Conditions to avoid:** Explosive in the presence of the following materials or

conditions: Open flames Sparks

Static discharge.

**10.5 Incompatible materials:** Reactive or incompatible with the following materials:

Oxidizing materials

10.6 Hazardous decomposition products: Under normal conditions of storage and use, hazardous

decomposition products should not be produced.

#### Specific target organ toxicity (single exposure)

#### Specific target organ toxicity (repeated exposure)

Potential acute health effects

Inhalation: Exposure to airborne concentrations above statutory or

recommended exposure limits may cause irritation of the

nose, throat and lungs.

No known significant effects or critical hazards. Ingestion: Skin contact: No known significant effects or critical hazards.

Exposure to airborne concentrations above statutory or Eye contact:

recommended exposure limits may cause irritation of the

eyes.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation: Adverse symptoms may include the following:

Respiratory tract irritation

Coughing No specific data.

Ingestion: Skin contact: No specific data.

Eye contact: Adverse symptoms may include the following:

Irritation Redness

Date of Issue: 7th June 2018 Page 36 of 64

#### Potential chronic health effects

Conclusion/Summary: Not available.

**General:** Repeated or prolonged inhalation of dust may lead to chronic

respiratory irritation.

Carcinogenicity:

No known significant effects or critical hazards.

Interactive effects: Not available.
Absorption: Not available.
Distribution: Not available.
Metabolism: Not available.
Elimination: Not available.
Other information: Not available.

## **SECTION 12: Ecological information**

12.1 Toxicity

Conclusion/Summary: Not available.

12.2 Persistence and degradability

12.3 Bioaccumulative potential:

12.4 Mobility in soil

**Soil/water partition coefficient (Koc):** Not available. **Mobility:** Not available.

12.5 Results of PBT and vPvB assessment

**12.6 Other adverse effects:** No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

**Product** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of

all authorities with jurisdiction.

Hazardous waste: Within the present knowledge of the supplier, this product is not

regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

Date of Issue: 7th June 2018 Page **37** of **64** 

**Packaging** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Waste packaging should be recycled. Incineration or landfill

should only be considered when recycling is not feasible.

**Special precautions:** This material and its container must be disposed of in a safe way.

Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways,

drains and sewers.

## **SECTION 14: Transport information**

### Notice to reader

The information in this SDS is based on the present state of our knowledge and on current laws. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. The information in this SDS is meant to be a description of the safety requirements for our product. It is not to be considered a guarantee of the product's properties.

Date of Issue: 7th June 2018 Page **39** of **64** 

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name: Magenta toner powder (cartridge) for

Pro6410 Neon Colour Series (Toner powder name: ONM-1)

**Product description:** Magenta Toner

1.2 Relevant identified uses of the substance or mixture and uses advised against

Material uses: For electrophotographic printing systems

1.3 Details of the supplier of the safety data sheet

Manufacturer: OKI Data Corporation

3-1 Futaba-cho, Takasaki-shi, Gunma. 370-8585 Japan

Tel: +81 27-328-6366 Fax: +81-27-328-6398

**Supplier:** OKI Europe Limited

Blays House, Wick Road, Egham, Surrey, TW20 0HJ, UK Tel: +44 (0) 208 219 2190 Fax: +44 (0) 208 219 2199

e-mail: SDSQuestions@okieurope.com

1.4 Emergency telephone number

**OKI Europe Limited:** +44 (0) 208 219 2190

(Supported 09:00 to 17:00 UK Time, Monday to Friday

except Bank Holidays)

### SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition: Mixture

### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

**Ingredients of unknown toxicity:** Percentage of the mixture consisting of ingredient(s) of

unknown toxicity: 54,1%

Ingredients of unknown ecotoxicity: Percentage of the mixture consisting of ingredient(s) of

unknown hazards to the aquatic environment: 80,5%

See Section 11 for more detailed information on health effects and symptoms.

See Section 16 for the full text of the H statements declared above.

Date of Issue: 7th June 2018 Page **40** of **64** 

2.2 Label elements

Hazard pictograms: No pictogram.
Signal word: No signal word.

**Hazard statements:** No known significant effects or critical hazards.

**Precautionary statements** 

Prevention:Not applicable.Response:Not applicable.Storage:Not applicable.Disposal:Not applicable.

Hazardous ingredients:

Supplemental label elements: Not applicable.

### 2.3 Other hazards

#### Other hazards which do not result in classification:

Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## **SECTION 3: Composition/information on ingredients**

Substance/mixture: Mixture

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

### <u>Type</u>

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

training.

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the

upper and lower eyelids. Check for and remove any contact lenses.

Get medical attention if irritation occurs.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable

for breathing. Get medical attention if symptoms occur.

Skin contact: Flush contaminated skin with plenty of water. Remove contaminated

clothing and shoes. Get medical attention if symptoms occur.

Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at

rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by

medical personnel. Get medical attention if symptoms occur.

Date of Issue: 7th June 2018 Page 41 of 64

## 4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the nose, throat and lungs.

**Skin contact:** No known significant effects or critical hazards. **Ingestion:** No known significant effects or critical hazards.

Over-exposure signs/symptoms

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

Skin contact: No specific data. Ingestion: No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if

large quantities have been ingested or inhaled.

**Specific treatments:** No specific treatment.

## **SECTION 5: Firefighting measures**

5.1 Extinguishing media

Suitable extinguishing media: Use dry chemical powder.

**Unsuitable extinguishing media:** Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture: Fine dust clouds may form explosive mixtures

with air.

Hazardous combustion products: Decomposition products may include the

following materials: Carbon dioxide Carbon monoxide

> Halogenated compounds Metal oxide/oxides

Date of Issue: 7th June 2018 Page **42** of **64** 

5.3 Advice for firefighters

Special precautions for firefighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fireexposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without

suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on

appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take

note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency

personnel".

6.2 Environmental precautions: Avoid dispersal of spilled material and runoff and contact with

soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution

(sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill:

Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Use sparkproof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

Large spill: Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosionproof equipment. Dispose of via a licensed waste disposal

contractor.

6.4 Reference to other sections: See Section for emergency contact information.

See Section 8 for information on appropriate personal protective

equipment.

See Section 13 for additional waste treatment information.

Date of Issue: 7th June 2018 Page 43 of 64

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling Protective measures:

Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition precautionary measures sources. Take electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### **Seveso II Directive**

This product is not controlled under the Seveso II Directive

### 7.3 Specific end use(s)

Recommendations: Not available. Industrial sector specific solutions: Not available.

Date of Issue: 7th June 2018 Page 44 of 64

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker or exposure or environmental releases.

### 8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
Europe No exposure limit value known.	
Germany No exposure limit value known.	
Spain No exposure limit value known.	

### Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards , such as the following:

European Standard EN 689 (Workplace atmospheres – Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy)

European Standard EN 14042 (Workplace atmospheres – Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents)

European Standard EN 482 (Workplace atmospheres – General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### **DNELs/DMELs**

No DNELs/DMELs available.

### **PNECs**

No PNECs available.

### 8.2 Exposure controls

Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

Date of Issue: 7th June 2018 Page **45** of **64** 

### **Individual protection measures**

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection:

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If operating conditions cause high dust concentrations to be produced, use dust goggles.

Recommended: Splash goggles

Safety glasses with side-shields

Skin protection

Hand protection:

Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. >8 hours (breakthrough time): natural rubber (latex)

**Body protection:** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Recommended: Lab coat Overall

Other skin protection:

Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection:

Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Environmental exposure controls:** 

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Remark:

The penetration-time of the recommended gloves depends not only on the material. Also other factors may have influence on the penetration-time, as the thickness of them or the specific use or conditions (temperature). In any case, certificate materials (for example following EN 374) should be selected. Please ask your supplier, if the gloves are suitable for the intended use

Date of Issue: 7th June 2018 Page **46** of **64** 

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical and chemical properties

<u>Appearance</u>

Physical state: Solid. [Powder.]

Colour: Pink. Odour: Odourless. Odour threshold: Not available. pH: Not applicable. Melting point: Not available. Not available. Initial boiling point and boiling range: Flash point: Not available. Evaporation rate (butyl acetate= 1): Not available. Flammability (solid, gas): Not available.

Upper/lower flammability or explosive limits:Not available.Vapour density:Not available.Density:1.2 g/cm3 (20°c)

**Solubility(ies):** Partially soluble in the following materials:

Acetone.

Insoluble in the following materials:

Cold and hot water.
Not available.

Partition coefficient n-octanol/water:Not available.Decomposition temperature:Not available.Viscosity ( Dynamic ):Not available.

**Explosive properties:** Explosive in the presence of the following

materials or conditions:

Open flames Sparks

Static discharge. Not available.

9.2 Other information

No additional information.

Oxidizing properties:

# **SECTION 10: Stability and reactivity**

**10.1 Reactivity:**No specific test data related to reactivity available for

this product or its ingredients.

**10.2 Chemical stability:** The product is stable.

**10.3 Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous

reactions will not occur.

**10.4 Conditions to avoid:** Explosive in the presence of the following materials or

conditions: Open flames Sparks

Static discharge.

**10.5 Incompatible materials:** Reactive or incompatible with the following materials:

Oxidizing materials

**10.6 Hazardous decomposition products:** Under normal conditions of storage and use, hazardous

decomposition products should not be produced.

Date of Issue: 7th June 2018 Page **47** of **64**

### 2.3 Other hazards

### Other hazards which do not result in classification:

Fine dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.

## **SECTION 3: Composition/information on ingredients**

Substance/mixture: Mixture

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

### Type

- [1] Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

### **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable

training.

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the

upper and lower eyelids. Check for and remove any contact lenses.

Get medical attention if irritation occurs.

Inhalation: Remove victim to fresh air and keep at rest in a position comfortable

for breathing. Get medical attention if symptoms occur. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical

surveillance for 48 hours.

**Skin contact:** Flush contaminated skin with plenty of water. Remove contaminated

clothing and shoes. Get medical attention if symptoms occur.

Ingestion: Wash out mouth with water. Remove victim to fresh air and keep at

rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Do not induce vomiting unless directed to do so by

medical personnel. Get medical attention if symptoms occur.

Potential acute health effects

Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the eyes.

Inhalation: Exposure to airborne concentrations above statutory or recommended

exposure limits may cause irritation of the nose, throat and lungs. Exposure to decomposition products may cause a health hazard. Serious

effects may be delayed following exposure.

**Skin contact:** No known significant effects or critical hazards. **Ingestion:** No known significant effects or critical hazards.

Over-exposure signs/symptoms

**Eye contact:** Adverse symptoms may include the following:

Irritation Redness

**Inhalation:** Adverse symptoms may include the following:

Respiratory tract irritation

Coughing

Skin contact: No specific data. Ingestion: No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: In case of inhalation of decomposition products in a fire, symptoms may

be delayed. The exposed person may need to be kept under medical

surveillance for 48 hours.

**Specific treatments:** No specific treatment.

# **SECTION 5: Firefighting measures**

5.1 Extinguishing media

Suitable extinguishing media: Use dry chemical powder.

**Unsuitable extinguishing media:** Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture: Fine dust clouds may form explosive mixtures

with air.

Hazardous combustion products: Decomposition products may include the following materials:

Carbon dioxide Carbon monoxide Nitrogen oxides

Sulphur oxides

Halogenated compounds Metal oxide/oxides

Date of Issue: 7th June 2018 Page **54** of **64** 

5.3 Advice for firefighters

Special precautions for firefighters:

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: No action shall be taken involving any personal risk or without

suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing dust. Put on

appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take

note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency

personnel".

**6.2 Environmental precautions:** Avoid dispersal of spilled material and runoff and contact with

soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution

(sewers, waterways, soil or air).

6.3 Methods and materials for containment and cleaning up

Small spill:

Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor.

Large spill: Move containers from spill area. Approach release from upwind.

Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal

contractor.

**6.4 Reference to other sections:** See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective

equipment.

See Section 13 for additional waste treatment information.

Date of Issue: 7th June 2018 Page **55** of **64** 

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling Protective measures:

Put on appropriate personal protective equipment (see Section 8). Avoid breathing dust. Avoid the creation of dust when handling and avoid all possible sources of ignition (spark or flame). Prevent dust accumulation. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Electrical equipment and lighting should be protected to appropriate standards to prevent dust coming into contact with hot surfaces, sparks or other ignition precautionary measures sources. Take electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material.

Advice on general occupational hygiene: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities:

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### **Seveso II Directive**

This product is not controlled under the Seveso II Directive

### 7.3 Specific end use(s)

Recommendations: Not available. Industrial sector specific solutions: Not available.

Date of Issue: 7th June 2018 Page 56 of 64

## SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker or exposure or environmental releases.

### 8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
	Exposure minit values
Europe	
No exposure limit value known	
Germany	
Titanium Dioxide	TRGS900 AGW (Germany, 3/2015).
	TWA: 1,25 mg/m <sup>3</sup> 8 hours. Form: alveolar fraction
	PEAK: 20 mg/m <sup>3</sup> 15 minutes. Form: inhalable fraction
	TWA: 10 mg/m <sup>3</sup> 8 hours. Form: inhalable fraction
Aluminium Hydroxide	TRGS900 AGW (Germany, 3/2015).
	TWA: 1,25 mg/m <sup>3</sup> 8 hours. Form: alveolar fraction
	PEAK: 20 mg/m <sup>3</sup> 15 minutes. Form: inhalable fraction
	TWA: 10 mg/m <sup>3</sup> 8 hours. Form: inhalable fraction
	MAK-Werte Liste (Germany, 7/2015).
	TWA: 4 mg/m <sup>3</sup> 8 hours. Form: inhalable dust
	TWA: 1,5 mg/m <sup>3</sup> 8 hours. Form: respirable dust
Spain	INSHT (Spain, 1/2015).
Titanium Dioxide	TWA: 10 mg/m <sup>3</sup> 8 hours.

### Recommended monitoring procedures:

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards , such as the following:

European Standard EN 689 (Workplace atmospheres – Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy)

European Standard EN 14042 (Workplace atmospheres – Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents)

European Standard EN 482 (Workplace atmospheres – General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### **DNELs/DMELs**

No DNELs/DMELs available.

### **PNECs**

No PNECs available.

Date of Issue: 7th June 2018 Page **57** of **64** 

### 8.2 Exposure controls

Appropriate engineering controls:

Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

**Individual protection measures** 

Hygiene measures:

Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Eye/face protection: Safety eyewear complying with an approved standard

should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If operating conditions cause high dust

concentrations to be produced, use dust goggles.

Recommended: Splash goggles

Safety glasses with side-shields

Skin protection

**Hand protection**: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when

handling chemical products if a risk assessment indicates this is necessary. >8 hours (breakthrough time): natural

rubber (latex)

**Body protection:** Personal protective equipment for the body should be

selected based on the task being performed and the risks involved and should be approved by a specialist before

handling this product.

Recommended: Lab coat Overall

Other skin protection: Appropriate footwear and any additional skin protection

measures should be selected based on the task being performed and the risks involved and should be approved

by a specialist before handling this product.

**Respiratory protection:** Use a properly fitted, air-purifying or air-fed respirator

complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the

selected respirator.

Environmental exposure controls: Emissions from ventilation or work process equipment

should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary

to reduce emissions to acceptable levels.

**Remark:** The penetration-time of the recommended gloves depends

not only on the material. Also other factors may have influence on the penetration-time, as the thickness of them or the specific use or conditions (temperature). In any case, certificate materials (for example following EN 374) should be selected. Please ask your supplier, if the

gloves are suitable for the intended use

## **SECTION 9: Physical and chemical properties**

### 9.1 Information on basic physical and chemical properties

**Appearance** 

Physical state: Solid. [Powder.]

Colour: White. Odour: Odourless. Odour threshold: Not available. pH: Not applicable. Melting point: Not available. Initial boiling point and boiling range: Not available. Flash point: Not available. Evaporation rate (butyl acetate= 1): Not available.

Flammability (solid, gas):

Upper/lower flammability or explosive limits:

Vapour density:

Not available.

Not available.

Not available.

1.2 g/cm3 (20°c)

**Solubility(ies):** Partially soluble in the following materials:

Acetone.

Insoluble in the following materials:

Cold and hot water.

Partition coefficient n-octanol/water:

Decomposition temperature:

Viscosity ( Dynamic ):

Not available.

Not available.

**Explosive properties:** Explosive in the presence of the following

materials or conditions:

Open flames Sparks

Static discharge. Not available.

Oxidizing properties:

### 9.2 Other information

No additional information.

Date of Issue: 7th June 2018 Page **59** of **64** 

## **SECTION 10: Stability and reactivity**

10.1 Reactivity: No specific test data related to reactivity available for

this product or its ingredients.

**10.2 Chemical stability:** The product is stable.

**10.3 Possibility of hazardous reactions:** Under normal conditions of storage and use, hazardous

reactions will not occur.

**10.4 Conditions to avoid:** Explosive in the presence of the following materials or

conditions: Open flames

> Sparks Static discharge.

**10.5 Incompatible materials:** Reactive or incompatible with the following materials:

Oxidizing materials

**10.6 Hazardous decomposition products:** Under normal conditions of storage and use, hazardous

decomposition products should not be produced.

# **SECTION 11: Toxicological information**

### 11.1 Information on toxicological effects

Acute toxicity

**Conclusion/Summary:** Not available.

Acute toxicity estimates

TIONICO TOXICOTE CONTINUEDO

### Specific target organ toxicity (single exposure)

### Specific target organ toxicity (repeated exposure)

Potential acute health effects

Inhalation: Exposure to airborne concentrations above statutory or

> recommended exposure limits may cause irritation of the nose, throat and lungs. Exposure to decomposition products may cause a health hazard. Serious effects may be delayed

following exposure.

No known significant effects or critical hazards. Ingestion: No known significant effects or critical hazards. Skin contact:

Exposure to airborne concentrations above statutory or Eye contact:

recommended exposure limits may cause irritation of the

eyes.

Symptoms related to the physical, chemical and toxicological characteristics

Inhalation: Adverse symptoms may include the following:

Respiratory tract irritation

Coughing No specific data.

Ingestion: Skin contact: No specific data.

Eye contact: Adverse symptoms may include the following:

> Irritation Redness

### Potential chronic health effects

Conclusion/Summary: Not available.

General: Repeated or prolonged inhalation of dust may lead to chronic

respiratory irritation.

Carcinogenicity: No known significant effects or critical hazards. No known significant effects or critical hazards. Mutagenicity: No known significant effects or critical hazards. Teratogenicity: **Developmental effects:** No known significant effects or critical hazards. No known significant effects or critical hazards. Fertility effects:

Interactive effects: Not available. Absorption: Not available. Distribution: Not available. Metabolism: Not available. Not available. Elimination: Other information: Not available.

Date of Issue: 7th June 2018 Page 61 of 64

## **SECTION 12: Ecological information**

12.1 Toxicity

Conclusion/Summary: Not available.

12.2 Persistence and degradability

12.3 Bioaccumulative potential:

12.4 Mobility in soil

**Soil/water partition coefficient (Koc):** Not available. **Mobility:** Not available.

12.5 Results of PBT and vPvB assessment

**12.6 Other adverse effects:** No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

**Product** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of

all authorities with jurisdiction.

Hazardous waste: Within the present knowledge of the supplier, this product is not

regarded as hazardous waste, as defined by EU Directive 91/689/EEC.

**Packaging** 

Methods of disposal: The generation of waste should be avoided or minimized wherever

possible. Waste packaging should be recycled. Incineration or landfill

should only be considered when recycling is not feasible.

**Special precautions:** This material and its container must be disposed of in a safe way.

Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways,

drains and sewers.

Date of Issue: 7th June 2018 Page **62** of **64**
